

Needing slides in 16 X 9?

Things change. In this near instant information world, things change rapidly. The 4X3 aspect screen has served us well and for most PowerPoint related purposes, it still does. With the introduction of the wide screen movies and consequent wide screen TVs and displays, the standards for projectors have now changed to match.

If you are wondering if you can get Paperless Hymnal slides in 16X9, the answer is “Yes”. For those of you who have ordered either Volume 12 or 13, you already have both 4X3 and 16X9 formatted slides. They were automatically sent to you when you ordered after the introduction of Volume 12.

Do we automatically send out 16X9 files to all our customers? No – only to those who have placed orders recently.

Therefore, if you now need 16X9 slides, all you need to do is place an order for a new volume/s and you will automatically receive both, 4X3 and 16X9 aspect ratio slides with your order, at no additional cost to you. If you registered with us or placed your order with us, we will have a record of the volumes assigned to your congregation and will send all new files for those volumes also.

We also now distribute our files on USB drive, when asked. There is a \$4.00 charge for the drive. We also send along a warning about USB drive and passing them around. It is a great way to infect the PCs at your church, if one of the PCs has a virus, so please use caution. We guarantee our files to be virus free at the time we place data on the USB drive, but after that – well, caution.
